Hurricane Preparedness

With the approach of a storm in many of our locations, it is crucial that we are prepared.

See the next page for a few tips to consider when developing or reviewing your hurricane plan.

Stay safe, everyone!

HURRICANE PREPAREDNESS TIPS

TIPS:

- Post your emergency numbers and put together a means of communicating with your staff post-storm if there is no phone service.
- Do a building assessment to ensure that the siding, doors, roof panels and vents are in good condition.
- Prepare your docks. Check the dock cleats, pilings, and whalers. Be sure the piling guides, rollers, & electrical and water connections are in good condition.
- Ensure that trucks, forklifts, and tractors are fueled and running correctly and that your emergency pumps are working. Do you have enough hose and connections, and are they in good condition? Are your generators working, fueled and ready to go? Double check that fuel cans are filled and topped off.
- Make sure your spill boxes are adequately stocked.
- Make sure your spill boom is long enough (3X the length of your longest boat).
- If your facility has a chase boat, make sure it is operational and fueled, that fluid is checked, and that safety gear is present.
- Check your ground tackle for securing docks.
- Purchase the necessary hardware required to attach any storm coverings for doors and windows.
- Make sure you have enough sand bags, if needed.
- Make sure you have enough jack stands, level sets, crib blocks, and other materials needed to properly store vessels for the storm.
- Prepare a system for properly labeling and communicating vital information about each boat like owner and slip number. Does it store at your location or is it hurricane storage?
- Make sure to secure all items that can be transformed into projectiles during a hurricane such as brush racks, ladders, cones, water coolers, outdoor furniture, and items from a fish cleaning station such as cutting boards, rugs, and trash containers.
- Protect and cover any outside TVs.
- Safely store hard drives and secure sensitive files.
- Check your propane inventory.
- Make sure that gas grills are operational.
- If you have a lift station on property, check it for proper operation.
- Pull straps and slings from hoist and make sure the chains are retracted.
- Secure all fuel pumps.
- Remove any flags.
- Make sure that ice machines or boxes are secure and full.

CHECKLIST:

- Tarps
- Tie Down Straps
- Bungee Cords
- First Aid Supplies
- Flashlights
- Safety Glasses
- Ladders
- Gloves
- Plastic Sheeting

IT TIPS

- Unplug all electronic devices
- Take laptops and mobile devices home
- Unplug power strips, monitors, PC's, phones, printers, scanners, etc.
- Place them on top of desks or counters or on the second floor or strongest part of the building
- Shut the power off in case of water/storm damage and slowly turn breakers on to ensure there are no shorts

**** Very Important** Please go into Paylocity today and verify and update your cell phone numbers and emergency contact information.**

EVENTS

SPEND-A-DAY IN HOMECOMING PARADE

The Spend-A-Day crew is always happy to participate in the community, but they are more excited to support and share their younger team member involvement.

The Indian Lake Lakers' annual homecoming parade included a JC Tritoon pulling members from the Spend-A-Day group as well as additional floats that featured five members from their summer rental staff.

Submitted by Brenda Moots

SPEND-A-DAY GAME DAY EVENT

Spend-A-Day Marina recently celebrated a Buckeye victory with their Boats and Ballgame OSU Tailgate event. The Spend-A-Day team grilled the main course, and the fans brought the side dishes. At the end of the game, the team did a winterization bucket giveaway!

THE SLALOM SHOP EMPLOYEE OF THE MONTH

Congratulations to the Slalom Shop's employee of the month, Brittle Blevins. Brittle started in 2015 as a receptionist, moved into a title clerk role, and is now working as a boat buyer.

An additional congratulations goes to the manager of the quarter, Monica Bedenbaugh. Monica is the business manager who started in 2022.
