PROREVVVER UPDATES

The new email tool in ProRevver now has email signature.

Your email signature will automatically populate your name, email address, phone number, dealership logo, dealership address, and dealership website. There is nothing you need to do to set this up.

You will not see the signature when you are drafting your email, but you can select “preview” to see how it will look. Be sure you don’t add your own signature because this will cause you to have two signatures when the email is sent.

Update: You can now view the emails you have sent in ProRevver in your “Sent” folder in Outlook.
